

## We were fantastic explorers at Antony House

Evergreen trees keep their leaves all year round.

Back at school we spotted human and physical features using aerial maps taken from a drone.

Seeds, leaves and nuts fall off the trees in Autumn.

Redwing birds migrate in the Autumn as its too cold here.

The Holm Oak is an evergreen tree.

Did you know a Cinkgo tree was around with the dinosaurs.

Deciduous trees lose their leaves in Autumn.

## We have continued our learning journey about Robots

In maths we have been using the hundred square to solve addition and subtraction problems.

We became robot story tellers where we used actions and words to retell Pods adventure. We used this story to help us become authors.

We developed our coordination, agility and stamina through a range of team games.

Ava helped us to learn the seven continents in the world.

We have experimented with composing our own music using jamaquacks.

## We have also been learning about Christmas...

We used fantastic expression in the Christmas show!

We learnt the story of the nativity and found out about different Christmas traditions.

We made our own class Christingle!

We raised money by wearing our Christmas jumpers and even designed our own.

We designed and created our own unique Christmas card!

We designed our own Christmas drones and then helped Ava in her secret mission. We wrote descriptive sentences to tell her little brother all about the North Pole.

We have understood that Advent is a Christian celebration that counts down to Jesus Birthday.

## In the New Year we will be...

Continuing to use our fantastic phonics to read real and alien words.

Developing our understanding of Christmas by learning about Epiphany.

Using our knowledge of numbers to solve division number sentences.

Creating our own Winter learning wishes.

Working in the style of STOMP to create our own robot routines.
