

We love being in Year 2 and we have learnt so much already!

Look at what we have been learning!

We have found out all about our class animals and have even written our own non-fiction books using headings, facts and joining words.

We can use the 'more than' and 'less than' signs to show which is the biggest number and can explain why.

We made packaging for our fruit salad after looking at packaging from the shop and thinking about how we can make it exciting.

Our magic wands have arrived and we wrote our own stories about their journey using all of the skills we have learnt so far.

We have learnt to partition numbers in different ways and can show how they are made up of tens and ones.

We have created incredible winter scenes using a range of painting techniques and shades.

We have chosen our school council members after they wrote manifestos and read them to us. We also took part in a secret ballot to elect a representative.

We have found out all about food chains and can use the correct vocabulary such as 'producer' and 'consumer.'

We tasted different fruits from around the world and then made our own fruit salad, going on to write instructions for it using bossy verbs.

We can write noun phrases making sure we include adjectives to describe different places and things.

We researched all about the different continents and know what they are like and some of the landmarks that we would find there.

We have learnt all about the five different food groups and which foods are healthy or unhealthy.

We have become fantastic buddies to the children in reception and have already taught them new skills and games.

We have created sequences in PE of a roll, balance, jump and travel and then evaluated them to make them better.

We couldn't believe it when we went into the hall and discovered...

... a coastguard uniform...

... sea creatures tangled up in ropes and nets...

... posters showing people how to help to reduce the amount of plastic in the oceans...

... a giant whale made out of plastic and rubbish...

... a map of the world with the oceans labelled.
