

We have a super busy Spring term learning at home and now we are all back in school...

We have begun to learn, and will continue to practice, telling the time to the nearest 5 minutes. We confidently use o'clock, half past, quarter past and quarter to.

We can describe the properties of 3D shapes. We use the vocabulary vertices, edges and faces.

We can solve division by grouping or sharing. We know that it has to be fair.

We can solve multiplication by reading and drawing arrays as well as counting in steps of 2s, 3s, 5s and 10s.

We are able to use adjectives, verbs and adverbs to write exciting character descriptions about Zog and our own characters.

We have applied our knowledge of spelling rules, punctuation and vocabulary to edit super sentences.

We used adjectives to write riddles about characters from the Gruffalo. We enjoyed sharing these with our families.

Stickman needed our help! After he got lost from the family tree he wanted us to let his Stick-Lady Love know that he was safe on his adventures. We wrote letters, making sure we applied all the features we have learnt.

After carrying out our science experiment we wrote a set of instructions to plant a seed. We used our toolkit, which included bossy verbs, numbers and commands.

We created our own composition based on the amount of syllables in the names of animals.

We learnt about the artist Alison Russell and learnt how to recreate our very own silhouette art based on Tiddler.

We set up our science investigations, made predictions and changed variables to answer the question 'What conditions are best for growing plants?'

During our PE lessons we have been learning the skills to pass, dribble, attack and defend.

We learnt about the life of Julia Donaldson and order key events in her history.

We are able to name and locate the 7 continents and 5 oceans. We can explain which countries have hotter or colder climates.

We are eagerly awaiting a visit from our Magic Wands...

Next term we will be...

We will be revisiting our learning to use and solve problems including all 4 operations.

We will be applying our knowledge of measure in a range of ways.

We will be listening to and using tuned instruments to create music from other cultures.

We will be exploring our natural environment to find habitats and micro-habitats.

We will name, identify and locate human and physical features on maps and atlases.

In PE we will be learning the skills and rules to play team games, such as tennis and cricket.

We will be applying all of our skills and imagination to write our own super stories.

We will continue to learn rules about and apply accurate spelling, punctuation and grammar.
