

We have been super busy learning about The Great Outdoors.

We learnt about the different parts of a plant and labelled their structure.

We designed and made fruit muffins. We followed a recipe and mixed the ingredients ourselves. They tasted great!

We can solve division by grouping or sharing. We know that it has to be fair.

We can solve subtraction number sentences in a range of ways. We are good at using a number line and we can use drawings of tens and ones to help us.

We were detectives in reading and discovered the features we needed to write amazing instructions.

We are able to sequence our sentences to write instructions. We used the toolkit to help us remember what it needed to include.

We have written our very own instructions to help us on our outdoor adventures. We used bossy verbs and made sure that they were written in the correct order.

We carried out an observational experiment by looking at how seeds grow over time. We made predictions about how long we thought it would take, measured it at different intervals and wrote about what we found out.

In History, we have been learning about a significant person called George Forrester. We asked questions about who he could be, researched all about him and even learnt a song about him!

We have been singing songs concentrating on staying in time, pausing in between verses and working as a class.

We have learnt to use positional language to give instructions and we can program and debug the robot to reach different destinations.

In Art, we have been learning about famous artists called Henri Matisse and Barbara Hepworth. We have been exploring sculpture and working in the style of them.

In PE have been working on our ball control. We have become more confident in dribbling the ball between the cones.

We have been working as team in our outdoor area. We have made dens and created natural artwork

Next term we will be...

...doing some super athletics!

...learning how to stay safe in the sun.

...learning to write our own exciting stories.

...developing our understanding of the countries that make up the United Kingdom.

...learning to design and make our own bug hotels.

...developing our counting forwards and backwards in 2's, 5's and 10's.

...creating our own pieces of music using natural materials as our instruments.

...taking part in Natural Learning outside in our wildlife area.
